Graduation year: 2020 year

ADDITIONAL INFORMATION

Driver's license: **B** – passenger vehicles; **C** – trucks

About me: My name is Shakhzod. I'm a Junior+ PHP Developer with commercial experience. I became interested in web technologies back in school when I created static pages in HTML and CSS. Later I chose PHP as my primary tool for its web focus and mature ecosystem that helps to turn ideas into working services quickly.

My goal over the next 1,5 years is to grow into a strong Middle+ PHP Backend Engineer and deepen my expertise in designing high-load architectures.

PORTFOLIO
